

MEET THE ONCOLOGY EXPERT SEMINAR

Chair: Dr. Martine PICCART - GEBHART

MONTHLY SEMINAR : FRIDAY FROM 8:00 till 9:00

October to December 2025

FRIDAY OCTOBER 10, 2025

“Which are the most exciting new therapies for Breast Cancer on the horizon”

Dr. Juric is Director of the Termeer Center for Targeted Therapies & Program Director of the Investigational Cancer Therapeutics Program, Mass General Hospital Cancer Center. He is also Principal Investigator, Laboratory of Systems Pharmacology, Harvard Program in Therapeutic Science. Dr. Juric is a pioneering medical oncologist in targeted cancer therapies. He is a leading expert in genetic alterations associated with therapy resistance, continually expanding working knowledge of cancer biology, and providing insights into new treatment strategies.

Dejan JURIC, MD

Investigator & Assistant Professor, Medicine-Hematology & Medical Oncology, Mass General Hospital & Research Institute – Assistant Professor of Medicine, Harvard Medical School, Boston (USA)

FRIDAY NOVEMBER 07, 2025

“Combining treatment modalities: a synergy between external beam radiotherapy and radioligand therapy”

Dr Loic Ah-thiane is a radiation oncologist and has an expertise in nuclear medicine, particularly in radioligand therapy. He aims to understand how to improve management across different types of cancers, thanks to combining treatment modalities. His main clinical research focuses on associating the latest techniques of external beam radiotherapy to the latest radionuclides available to maximize the effects of ionising radiations.

Loic AH-THIANE, MD

Radiation oncologist, Department of radiotherapy, Institut René Gauducheau Cancer Center, Nantes (FR)

FRIDAY DECEMBER 05, 2025

“Leptomeningeal disease from breast cancer: towards better clinical care”

Dr. Louis Larrouquere is a medical oncologist and clinical pharmacologist at the Léon Bérard Cancer Center in Lyon, France, specializing in central nervous system (CNS) metastases. His research activity includes translational and fundamental research to develop innovative therapies, including intrathecal treatments and focused ultrasound approaches. He is the principal investigator of the ETIC-LM trial and founder of CALME, the largest French cerebrospinal fluid biobank dedicated to breast cancer CNS metastases.

Louis LARROUQUERE, MD, MSc

Medical oncologist and clinical pharmacologist, Centre Léon Bérard and Cancer Research Center of Lyon, Lyon (FR)
