Chair of the Francophone Accreditation
Commission / Federation Wallonia-
Brussels
Chair of the uro-oncology guidelines /
Belgian College of Oncology
Deputy Editor-in-Chief / French Journal
of Urology

Biography

Graduated from the René Descartes Faculty of Medicine, University of Paris V, in 1989, I pursued my specialization in Urology at the Université Libre de Bruxelles (ULB), where I was certified as a specialist in 1999. My career has enabled me to develop several areas of expertise at Erasme Hospital, notably in uro-oncology, andrology, penile reconstructive surgery, and implantology. With a strong background in clinical and translational research, I have led several studies as principal investigator and have authored or co-authored more than 250 peer-reviewed publications.

Currently, I serve as Professor of Urology and Lecturer at the Faculty of Medicine of ULB. In parallel, I chair the uro-genital oncology guidelines group within the Belgian College of Oncology and sit on the scientific committee of the Belgian Association of Urology. My academic and scientific commitment also continues as Deputy Editor-in-Chief of the French Journal of Urology, where I actively contribute to the dissemination of advances in the field.

I firmly believe that the future of healthcare lies in personalized treatments tailored to each patient's unique characteristics, aiming to provide more effective and humane medicine. This is the vision we are committed to implementing and promoting at the Brussels University Hospital.

Research topics

Myeloperoxidase in prostate diseases and in erectile dysfunction
